## **SECOND PROPOSAL**

### **Name: KR Farming**

#### **Brief History:**

Founded in 2018, KR Farming is a family-owned agricultural business specializing in crop cultivation and livestock farming. The farm started with small scale maize and vegetable production and has since expanded into a larger scale vegetation. KR Farming is committed to sustainable farming practices, community development, and providing high quality, fresh produce to local markets and suppliers.

#### **Mission:**

To provide fresh, healthy, and sustainably produced food while empowering local communities through agricultural development.

#### **Vision:**

To become a leading name in sustainable farming in South Africa, known for quality produce, ethical farming practices, and community upliftment.

#### **Target Audience:**

- Local households and communities
- Retailers and fresh produce markets
- Restaurants and small businesses

## **2. Website Goals and Objectives**

### **Website Goals:**

- Showcase KR Farming's produce and livestock products.
- Share the story and values of the business, highlighting sustainable farming practices.
- Allow wholesalers, retailers, and customers to place bulk or direct orders online.
- Provide updates, farming insights, and seasonal produce availability.

### **Key Performance Indicators (KPIs):**

- Increase online visibility and website traffic by 25% within the first 3 months.
- Generate at least 15% of sales inquiries through the website within 4 months.
- Build a subscriber base for newsletters and farming updates.

## **3. Current Website Analysis**

### **Strengths**

- Map that directs you to our location.
- Social media links are included.

### **Weaknesses**

- No official website, meaning limited credibility and professional online presence.
- Customers not able order directly online.
- Lack of information on products, pricing, and delivery services.

### **Areas for Improvement**

- Create an online ordering and enquiry system for efficiency.
- Features like forms and enquiry to increase engagement.
- 

## **4. Proposed Website Features and Functionality**

### **Important Features:**

- Homepage: Overview of KR Farming, featured produce, and latest updates.
- About Us: History, mission, vision, and farming practices.

- Products/Services: Detailed listings of crops, livestock, and available produce.
- Enquiry Page: Online form for bulk orders, partnership requests, and supplier enquiries.
- Contact Page: Contact details, operating hours, and Google Maps integration.

## 5. Design and User Experience

- Layout: Professional, clean design with farm imagery (produce, livestock, fields).
- User Experience: Easy navigation and responsive design
- Navigation: Clear top navigation bar with categories for quick access.
- Product Display: Grid layout with seasonal availability and order/enquiry buttons.

## 6. Technical Requirements
